Executive Summary

The Alaska Department of Health and Social Services (DHSS) is committed to improving food stamp program payment accuracy. Error trends are identified through analysis of Quality Control (QC) data and plans are formulated to reduce or eliminate errors.

In federal fiscal year (FFY) 2006, Alaska's final Food Stamp payment error rate for active cases was **5.81** percent which was below the national average of 5.99 percent and ranked Alaska 24th among States. For the first half of FFY 2007, the payment error rate decreased to **3.73** percent which ranks Alaska 16th overall and 3rd in year to year improvement. The national average for the first six months of FFY 2007 is 5.36 percent.

Alaska's final Food Stamp negative case error rate for denied, terminated, or suspended cases in FFY 2006 was **3.57** percent, which ranked Alaska 24th among States and below the national average of 8.02 percent. For the first half of FFY 2007, the negative error rate is **3.03** percent, versus a national average of 7.87 percent, which ranks Alaska 17th.

The November 2007 Food Stamp Program Corrective Action Plan focuses on the Quality Control reviews for FFY 2006 (October 2005 through September 2006) and the first half of FFY 2007 (October 2006 through March 2007).

Alaska's Food Stamp Payment Accuracy Rates are as follows:

Active Payment Accuracy Rate: FFY 2006 Full Year Rate of **94.19** percent

FFY 2007 Half Year Rate of 96.27 percent

Negative Case Accuracy Rate: FFY 2006 Full Year Rate of **96.44** percent

FFY 2007 Half Year Rate of 96.97 percent

The chart below illustrates the progression of Alaska's active payment accuracy rate for FFY 2003 - FFY 2007, with major initiatives that were implemented.

Year	Corrective Action Activity	Accuracy Rate
FFY 07	 Alaska implemented the Corrective Action Feedback and Evaluation (CAFÉ) Committee 	96.27%*
FFY 06	Alaska conducts Workload Analysis StudyDPA Reports Website	94.19%
FFY 05	Standardized Case Notes (CANO) implemented	93.49%
FFY 04	 Alaska implemented Semi-Annual Reporting in January 2004 to help reduce client errors Regional Case Readers deployed Annual Statewide Learning Summits initiated Web Based Skill Challenges introduced 	93.04%
FFY 03	 Alaska implemented the Quality Assessment Review Committee (QARC) November 2003 Implementation of the statewide Case Review Tool Creation of Local Quality Councils 	86.12%

^{*} Reflects an unregressed accuracy rate for the first six months of FFY 2007.

I. INTRODUCTION

In federal fiscal year (FFY) 2006, the national average Food Stamp payment error rate was 5.99 percent. Alaska's payment error rate was **5.81** percent which is a .7 percent improvement over the payment accuracy achieved in FFY 2005, even with continued caseload growth. Alaska continues its efforts to increase payment accuracy in FFY 2007. Alaska is on track to decrease its error rate for a fourth year in a row recording a rate of **3.73** in the first six months.

Alaska's negative Food Stamp case error rate in FFY 2006 was **3.57** percent, far better than the national average of 8.02 percent. Our negative error rate has consistently been lower than the national average over the past seven years. In the first six months of FFY 2007 Alaska's error rate is **3.03** percent.

The following chart shows the progression of the state's active and negative error rates for the past ten years, compared to the national average.

Alaska Historical Error Rates Actives and Negative, FFY 1998 to FFY 2007

Federal Fiscal Year	Alaska Active Payment Error Rate	Active National Average	Alaska Negative Case Error Rate	Negative National Average
½ of 2007	3.73%	5.36%	3.03%	7.87%
2006	5.81%**	5.99%**	3.57%**	8.02%**
2005	6.51%**	5.84%**	0.89%**	6.91%**
2004	6.96%**	5.88%**	2.60%**	6.52%**
2003	13.88%**	6.63%**	3.11%**	7.64%**
2002	10.99%**	8.26%**	7.44%**	7.87%**
2001	9.69%**	8.66%**	4.17%**	8.31%**
2000	7.24%**	8.91%**	4.55%**	5.41%**
1999	15.94%**	9.86%**	4.71%	2.61%
1998	14.19%**	10.7%**	4.21%	2.44%

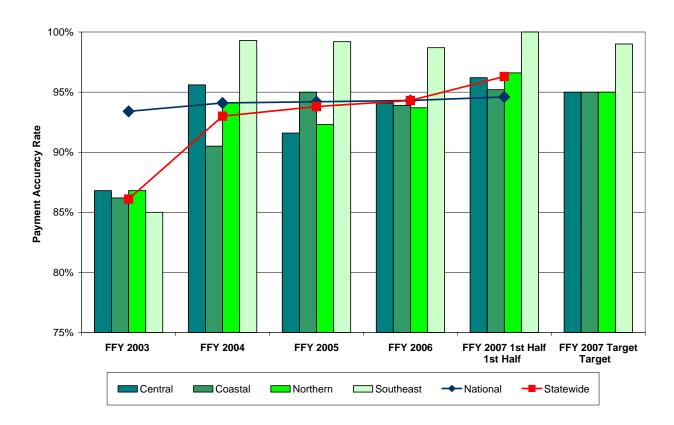

^{**} Actives are regressed rates and Negatives are validated rates.

Negative error figures prior to 2000 are not validated.

In this Corrective Action Plan, the error rates are the unregressed rates unless the error rate is specifically identified as being the regressed rate (as in the table above). The unregressed error rate represents state quality control actual findings, also called state-reported findings. The regressed error rate is an adjustment to the state-reported findings and takes into account any federal differences with state-reported findings and the number of reviews completed.

The following graph further illustrates Alaska's active payment accuracy for the past five years in comparison to the national average, and provides further delineation by Alaska region.

Recent History of Food Stamp Payment Accuracy Rates: National, Statewide, and Regional

Alaska met its 94 percent accuracy goal for 2006. To build upon our success we are striving for a 95 percent accuracy target under our new "Give Me Five" campaign for 2007. Achieving this goal will take a statewide effort to focus on actions that will bring each region's accuracy up one more percentage point.

Alaska completed 410 of the required 414 federal active reviews for FFY 2006. The number of required reviews has increased from 354, 377 and 394 in FFY 2003 through 2005, in response to increased caseloads. In FFY 2006 FNS Quality Control staff reviewed 48 percent of the state's completed cases, plus 100 percent of cases dropped as "not subject to review" or "incomplete". If FNS disagrees with the state finding, the difference (if upheld after arbitration) is factored into one part of the regression rate. The other part of the regression rate is determined by how many reviews are completed. The entire regression rate is then added to the state-reported rate. The (unregressed) state-reported rate for FFY 2005 was 6.17 percent. Adding the regression rate of 0.34 percent resulted in the official regressed rate of 6.51 percent. Regression rates are always determined after the final cases are reported for the federal fiscal year.

A similar process is followed when determining the negative case error rate. In FFY 2006 the State was required to complete at least 299 negative reviews and did complete 309 negative reviews. In FFY 2006 FNS reviewed 37 percent of the completed cases, plus all cases dropped as "not subject to review".

Alaska's May 2007 Food Stamp Program Corrective Action Plan addressed all reviews for FFY 2006 and described initiatives to address the active and negative error rates. This plan focuses on our new goal of 95 percent accuracy for FFY 2007, and outlines the corrective actions to help us achieve it.

Section II of this report contains the analysis of errors and error trends. Section III addresses corrective action activities and initiatives, specifically addressed to the error elements that have the greatest impact on the state's error rate.

Federal Bonuses

The seven states with the highest payment accuracy and the three states with the most improved payment accuracy receive bonuses. Alaska received a \$205,389 bonus for most improved payment error rate from FFY 2003 to FFY 2004. Alaska is vying for another most improved bonus from FFY 2006 to FFY 2007. After six months of FFY 2007, Alaska ranks third in improvement.

Alaska Food Stamp Reinvestment Plans

The State of Alaska met its obligations under the FFY97, FFY98, FY99, and FFY01 Reinvestment Plans. The plans aim to improve Food Stamp payment accuracy by state investment in corrective action initiatives with this purpose. The State still has FFY02 penalty money at risk for FFY 2004 and 2005, and has negotiated with FNS to reinvest 100 percent of its FFY 2004 and FFY 2005 at-risk amounts. The state requested relief in spite of missing its target because it was able to reduce the error rate 6.92-percentage points between FFY 2003 and FFY 2004.

II. ANALYSIS OF ERRORS

A. Methodology:

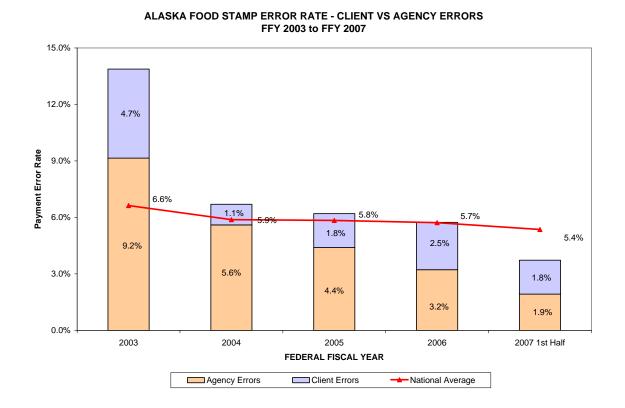

The primary data source for this report was the findings from the federally required QC review process conducted by the state.

Findings are listed as either dollar errors or case errors. A dollar error percentage rate (used for active reviews) is computed by dividing the dollar amount in error into the total dollars issued to sampled cases. A case error percentage rate (used for negative reviews) is determined by dividing the number of cases with countable errors into the total number of reviews completed.

B. QC Active Case Error Data Analysis:

Agency Versus Client Errors

In January 2004, Alaska implemented Semi-Annual Reporting in an effort to reduce client errors. As the following chart illustrates, Semi-Annual Reporting appears to have contributed significantly to the improvement of Alaska's payment error rate.

Alaska will continue to seek ways to reduce client-caused errors; however, corrective action efforts are now mainly focused on reducing agency- caused errors.

Comparison of Primary Error Elements

This table provides information about the primary agency-caused errors found in FFY 2006 and 2007, based on QC data reported to FNS. It examines the number of times errors occurred in the various error elements, the total error dollars that occurred in each element, and the percent of error dollars to the total number of agency- caused error dollars.

Agency Caused Errors

Primary Error Elements and Error Dollars

	Element Code and Description				
311	Wages and Salaries				
150	Household Composition				
560	Reporting System				
346	Other Unearned Income				
344	TANF, PA, or GA				
334	Unemployment Compensation				
331	RSDI Benefits				
363	Shelter Deduction				
350	Child Support Received				
314	Other Earned Income				
312	Self-Employment				
170	Social Security Number				
336	Other Government Benefits				
520	Arithmetic Computation				
333	SSI and/or State SSI Supplement				
221	Real Property				
323	Dependent Care Deduction				
364	Standard Utility Allowance				
	Total				

Full Year FFY 2006					
#	\$	% of \$			
9	\$1,321	32%			
3	\$591	14%			
1	\$509	12%			
5	\$279	7%			
2	\$244	6%			
2	\$235	6%			
3	\$211	5%			
3	\$204	5%			
2	\$109	3%			
1	\$108	3%

1	\$73	2%			
1	\$54	1%			
1	\$36	1%			
1	\$26	1%			
36	\$4,082	100%			

	Half Year FFY 2007							
#	# \$ % of \$							
3	3	\$179	15%					
3		\$304	25%					
_1	l	\$46	4%					
_1	l	\$154	13%					
_1	l	\$55	4%					
_1	l	\$54	4%					
4	1	\$161	13%					
2	2	\$90	7%					
1		\$118	10%					
		\$40	3%					
		\$29	2%					
1	9	\$1,230	100%					

In FFY 2006, \$7,264 was paid in error. Of this amount, \$4,082 was in cases with agency errors and with the remaining \$3,182 was in cases with client caused errors. In the first half of FFY 2007 \$2,383 was paid in error. Of this amount,

\$1,230 was in cases with agency errors and the remaining \$1,153 was in cases with client caused errors.

Wages and Salaries (Earned Income) errors, element code 311, represent 9 of 36 errors or 25 percent of all active agency caused errors reported to FNS in FFY 2006. However, these errors account for 32 percent of agency-caused dollar errors in FFY 2006, a disproportionate share of error dollars.

In the first half of FFY 2007, Wages and Salaries errors only represent 16 percent of cases and 15 percent of the dollars in error. Child Care Received errors are the most prevalent at 21 percent (four of nineteen) of agency caused error cases. In terms of dollars, 25 percent of the agency errors were in the Household Composition category.

Comparison of Primary Error Causes

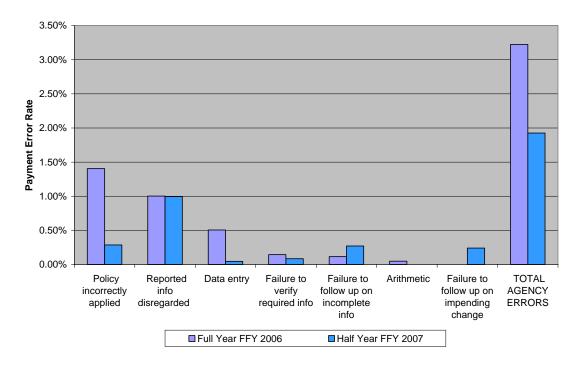

Causes of Agency Wages and Salaries Errors

	Full `		Half FFY	
Cause Description	Dollars	Percent	Dollars	Percent
Policy incorrectly applied	\$731	0.58%	\$57	0.09%
Reported information disregarded	\$464	0.37%	\$52	0.08%
Data entry error	\$65	0.05%	\$0	0.00%
Arithmetic error	\$61	0.05%	\$0	0.00%
Failure to follow up on incomplete info	\$0	0.00%	\$70	0.11%
Total Agency Responsibility Errors	\$1,321	1.04%	\$179	0.28%
Total Food Stamp Sample Allotment	\$126,633	198.25%	\$63,874	100.00%

Agency caused wages and salaries errors in FFY 2006 represented 1.04 percent of the payment error rate (down from 2.10 percent in FFY 2005). In the first half of FFY 2007, wages and salaries errors only represent .28 percent of the error rate.

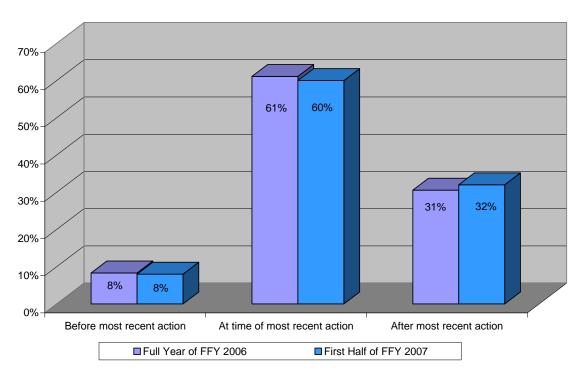

The following table compares the agency payment error rates for all error elements by cause category for FFY 2006 and the first half of FFY 2007. The total agency payment error rate for the first half of FFY 2007, 1.93 percent, is down from the FFY 2006 rate of 3.22 percent. The category of agency cause that has shown the most improvement so far in FFY 2007 is Policy Incorrectly Applied.

Agency Payment Error Rate by Error Cause

Comparison of Errors by Time of Occurrence

When Agency Errors Occur in Relation to the Most Recent Certification/Recertification

As illustrated in the previous chart, FFY 2006 and FFY 2007 are consistent and most agency errors occur at the time of the most recent certification or recertification. Focusing case review efforts at the time of recertification and certification increases the likelihood of catching and correcting errors, and using case reviewer and supervisory resources most effectively.

C. Negative Case Errors:

In FFY 2006, Alaska reported 11 negative errors, for a negative case error rate of 3.56 percent. The national average was 6.31 percent. In the first half of FFY 2007, Alaska has 5 errors for a 3.03 percent error rate while the national average is 7.87 percent. Alaska's negative cases (denied, terminated, or suspended) have maintained an error rate consistently below the national average for the past seven years.

D. Quality Control Case Reviews Not Completed:

Not Completed Rates in the following table are determined by dividing the Not Completed reviews by the Reviewable Cases (the Sampled Cases less the Not Subject to Review cases). If the non-completion rate is above 2%, states incur a completion rate adjustment to their combined payment error rate (CPER) which is the final regressed payment error rate. The official Not Completed rate can be higher than in the table if the reviewable cases are less than the required minimum sample. In FFY06 Alaska's completion rate adjustment added 0.19% to the final error rate.

Reviews reported as Not Subject to Review are not count against the state's completion rate. Not Subject to Review cases are commonly those households that have moved out of state, have died, or cannot be located after several documented attempts. Not Completed cases do count against the state's completion rate and include those cases in which the client has refused to cooperate in the review process and the state has been unable to reach a likely conclusion regarding the household's eligibility and benefit amount from available information. In these situations, clients are placed in sanction and do not receive further food stamps until they cooperate in the review process, or ninety-five days have passed since the end of the federal fiscal year (usually January 3 of the next year).

Not Completed cases also include those in which the client cooperated, but collateral sources did not cooperate or return needed information for mandatory verifications, and the state has been unable to reach a likely conclusion regarding the household's eligibility and benefit amount.

Dropped Cases _____

Diopped Gases						
	Sampled Cases	Less: Not Subject to Review	= Reviewable Cases	Less: Not Completed	= Completed Cases	Not Completed Rate

			•	•		•

III. CORRECTIVE ACTIONS

Alaska remains committed to Food Stamp Program payment accuracy. Over the years, DHSS has implemented processes that we believe contribute to lowering the error rate. Examples include: implementation of the statewide Case Review Tool, adoption of Semi Annual Reporting, prospective budgeting, the Quality Assessment Review Committee (QARC), a process to ensure that QC errors found in the QARC process are being corrected, Local Quality Councils comprised of staff who strive to develop process improvements at the office level, regularly updated on-line policy manuals, regional case reviewer positions, standardized case notes (CANOs), increased involvement by supervisors in leadership meetings and in training and mentoring staff, annual statewide training workshops, DPA employee web site home page with constant focus on Food Stamp accuracy, and the DPA eNews. In the current federal fiscal year Alaska implemented the Corrective Action Feedback and Evaluation (CAFÉ) Committee to address and monitor the corrective actions outlined in the Corrective Action Plan.

This section focuses on the most common errors, examines progress made in correcting these errors, and identifies initiatives and improvements. We believe the tools described in this section are our best means of reducing the food stamp error rate.

One of the most significant payment accuracy initiatives has been the Quality Assessment Review Committee (QARC). Begun in 2003, it is the main forum for reviewing all quality control errors, whether active or negative. All errors are thoroughly examined within our Quality Assessment Unit, but the QARC provides a final evaluation of each error to determine if all policies were correctly applied. In addition, the substance of each error is reviewed to determine trends, system changes, training needs, and other corrective action needed to prevent future occurrences of the same type of error. Discussions of case errors at the QARC are also a primary source for articles for the Division's electronic newsletter DPA ENews. The committee reviews error cases from other programs as well, which can lead to beneficial changes that also affect the Food Stamp Program.

Another initiative involves the adoption of standardized case note (CANO) formats in our Eligibility Information System to help eligibility workers reduce the instances of overlooked eligibility criteria. This also helps workers document their actions and findings consistently statewide and helps prevent errors when cases are transferred between local offices.

A common theme throughout all error elements is the prevalence of agency-caused errors. Workers not knowing what action to take, and workers not taking any action on the reported information most commonly cause these errors. Training addresses the first problem, as the purpose of training is to teach people what action needs to be taken and how to do so correctly. The second issue is more difficult. Quality Assessment and supervisory staff will be working with eligibility staff to identify critical points in the process. This information, will be used to identify and recommend needed improvements.

For FFY 2006, we identified the top four agency-caused payment errors by identifying the dollar amount of these errors in relation to the amount of all agency error dollars. The top four errors (below) account for 65 percent of all agency caused dollar errors.

The top four agency caused payment errors that occurred in FFY 2006 are:

- Earned Income, 32%
- Household Composition, 14%
- Reporting System, 12%
- Other Unearned Income, 7%

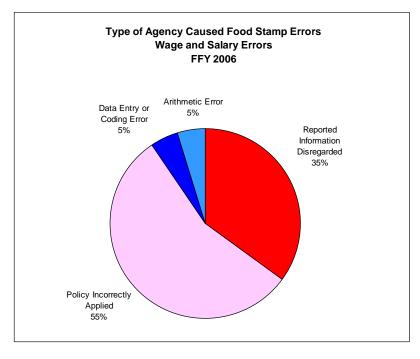

A. Corrective Action on Top Four Errors

Earned Income, Element 311:

The 9 agency-caused earned income errors (totaling \$1,321) accounted for 32 percent of all agency caused error dollars in FFY 2006.

Cause:

As illustrated below, Alaska's largest payment errors are due to incorrect application of policy and reported information disregarded. Incorrect application of policy occurred when: the worker set alerts no longer needed under prospective budgeting, the worker didn't contact the employer as needed to anticipate irregular income, income for a child age 18 was not counted, and UIB was noted in case notes but not prospected. Reported information disregarded occurred when: income wasn't recalculated when paychecks were provided, the worker didn't know how to read U.S.P.S. pay stubs for regular and COLA income, and the wages of an 18 year old high school graduate were not counted.

Corrective Actions:

Supervisors and Regional Case Reviewers focus ongoing review efforts on work performed by new caseworkers and on high allotment earned income cases. This supplements the more formal classroom training provided by the Staff Development and Training (SD&T) Unit, and provides on-going and constant feedback within the offices. A number of additional initiatives are underway at the state, region and office level to promote payment accuracy. All of the initiatives described in Section C below have improvement of payment accuracy in cases with earned income as a primary focus. In addition, the updated corrective action planning record is presented in Section E.

Household Composition, Element 150:

The 3 agency caused Household Composition errors (totaling \$591) accounted for 14 percent of all agency caused error dollars in FFY 2006.

Cause:

Agency-caused errors occurred when: policy was applied incorrectly regarding a parent and her children 21 years of age or younger, and information reported at application was not applied.

Corrective Action:

Efforts have been made each year to identify ways to reduce the number of errors caused when eligibility workers do not take action, or do not take the correct action, on reported changes. Alaska plans to further enhance its corrective action strategies through training to help managers and supervisors gain the ability and knowledge to assess data and identify error trends and causal factors.

Reporting System, Element 560:

One \$509 agency caused reporting system error accounted for 12 percent of all agency-caused error dollars in FFY 2006.

Cause:

This error occurred when the eligibility worker was attempting to align the certification periods for a combo case, and certified the household for eight rather than six months.

Corrective Action:

Training was provided to staff on certification periods and how to align certification periods for combo cases.

Other Unearned Income, Element 346:

The 5 agency-caused Other Unearned Income errors (totaling \$279) accounted for 7 percent of all agency caused error dollars in FFY 2006.

Cause:

These errors were due to: incorrect computation of mortgage/rental income, not counting Senior Care income, and receipt of the Permanent Fund Dividend (PFD) in the application month.

Corrective Action:

The Division has a work group focused on improving PFD training and work flow processes. Efforts are also being focused on identifying ways to reduce the number of errors caused when eligibility workers do not take action, or do not take the correct action, on reported changes.

B. <u>Corrective Action on Other Error Trends</u>

Historical Monthly Error Rates

As illustrated in Section II of this report, Alaska tends to experience a spike in agency caused payment errors occurring in the month of November. Alaska is focusing efforts on identifying and addressing the cause of this seasonal payment error spike in an effort to prevent its reoccurrence.

Errors By Time of Occurrence

As noted in Section II of this report, Alaska reported that in FFY 2006, 67 percent of errors occurred before or at most recent certification. Alaska is reviewing its processes to determine if case reviewer, supervisory and other staff resources can be used more effectively to identify and correct errors at re-certification and certification.

C. Ongoing Payment Accuracy Initiatives:

The initiatives listed below involve ongoing long-term implementation plans.

Focused Case Reviews:

Intensive case reviews by supervisors and case reviewers are being used in all regions to address specific issues identified through QA reviews, Management Evaluation reviews, and Local Quality Councils. Ongoing review efforts target work performed by new caseworkers and on high allotment earned income cases. These reviews supplement the more formal classroom training provided by the Staff Development and Training (SD&T) Unit, and provide on-going and constant feedback within the offices.

Quality Assessment Review Committee (QARC):

Initiated in November 2003, the QARC meets every month. It is the primary statewide forum for discussing food stamp errors, trends, and action steps for improvement. We believe the greatest impact is in improved communication and in identifying training needs, unclear policies, and automation enhancements needed to improve operating systems. The state's error rate is reduced by an average of 2 percentage points because cases are reviewed by the QARC. The Quality Assessment Unit also sends "Case Correct" recognition pins to the local offices for all workers with cases reported as correct.

Corrective Action Feedback and Evaluation (CAFÉ) Committee:

The CAFÉ meets monthly to address and monitor the corrective actions outlined in the Corrective Action Plan. The CAFÉ is comprised of representatives from the Policy and Program Development Unit, Staff Development and Training, Systems Operations, Quality Assessment, the Chief of Field Services, and each Field Services Region. The CAFÉ works collaboratively to implement and monitor the corrective actions that were identified and prioritized during the Corrective Action Planning meeting as having the greatest impact in addressing Food Stamp Program errors.

DPA Electronic Newsletter:

The newsletter, *DPA ENews*, is issued quarterly throughout the year and has replaced "*QARC Rules*" as the source of feature articles drawn from Quality Control errors discussed by the QARC. Recent issues have covered the "Notice of Missed Interview", following up on Quality Assessment errors, the Food Stamp certification period for semi-annual reporting households, notifying households about shelter costs that have not been verified, and using the eligibility system's advance issuance indicator for expedited food stamp situations. Prior issues of DPA eNews can be viewed at:

http://dpaweb.hss.state.ak.us/training/enews/index.html

DPA Web:

The DPA employee home page prominently displays the state's Food Stamp accuracy goal, as well as the year-to-date accuracy rate and the error rate as a four-month running average. Clicking on this information, which is updated every month, provides the user with a current analysis of errors on Food Stamp active cases including our national ranking and a breakdown of case and payment accuracy by Region and District Office. Periodic updates on the Division's progress in its "Give Me Five!" Food Stamp Accuracy Campaign are featured on the employee home page to promote continuous focus on Food Stamp accuracy. The Division's employee home page can be viewed at: http://dpaweb.hss.state.ak.us/

Skill Challenges:

The Staff Development & Training Unit has produced a number of "Skill Challenges" as a means of providing ongoing refresher training on topics that are problematic for staff. The challenges are web based interactive training videos

that provide an interesting and stimulating means of delivering targeted training. Each "Challenge" includes a quiz and links to the policy manual for further information. Topics include: Certification/Recertification, the Food Stamp Challenge, Semi-Annual Reporting, Estimated Income, and treatment of PFD Hold Harmless income. The "Skill Challenges" can be viewed at: http://dpaweb.hss.state.ak.us/training/Quiz/QuizMain.htm

Learning Summits:

The annual Learning Summits are a successful means of providing ongoing refresher training for all staff throughout the state. Training includes general eligibility policy for all programs, such as household composition and counting income. Offices are also given the option of an elective. Office agenda can be seen at our web site:

http://dpaweb.hss.state.ak.us/training/Calendar/learningsummits/index.html.

Local Quality Councils:

The goals of the Local Quality Councils are to review, discuss and plan ways to continuously improve the Division's business practices. The councils are comprised of staff representatives who enjoy the challenge of problem-solving their office issues, and soliciting and providing feedback from other staff in their regions. Among the top priorities of the councils are to review and assess local performance data, and to evaluate issues and initiate solutions when a performance area needs improvement. The local quality councils are an integral part of the Division's corrective action planning efforts. More information about the quality councils can be viewed at:

http://dpaweb.hss.state.ak.us/wiki/index.php?page=QualityCouncils

Food Stamp Program Management Evaluation Reviews

Alaska conducts periodic management evaluation reviews of program administration in local offices, focusing on the priority review topics established annually by FNS. In addition to interviews with staff, the review team examines office performance history and related documentation in advance of and during the review. Payment accuracy and corrective action follow-up and planning are an integral part of the reviews.

Food Stamp Program Quality Assessment Report

The Program Integrity and Analysis Unit produces an annual Food Stamp Program Quality Assessment Report. The report describes the Quality Control process and the Division's progress in reducing Alaska's Food Stamp payment error rate. Region and office level payment error findings are presented, as well as comparisons to other Western Region States. The report is another tool available to help managers analyze and address payment errors at the region and local office level.

http://dpaweb.hss.state.ak.us/QA/PDF/FoodStampReportFFY2006.pdf

D. <u>Case Review Non-Completion:</u>

FNS reviews all cases reported as "incomplete" or "not subject to review".

Active case reviews:

Federal quality control requirements state that a quality control review may be reported as incomplete if the sampled case meets certain requirements. If incomplete reviews comprise more than 5 percent of the sample, the state must identify corrective action.

In FFY 2006, 24 cases were subject to review but not completed. This represents 5.9 percent of all completed active cases, and thus exceeds the threshold of 5 percent.

E. <u>Detailed Corrective Action Plans:</u>

Staff representing the Policy and Program Development Unit, Staff Development and Training, Systems Operations, Program Integrity & Analysis, Quality Assessment, the Chief of Field Services, and each Region have collaborated in the development of these corrective actions, and in monitoring them through the CAFE. The actions focus on the top agency caused payment error elements and other identified error trends.

Problem: Earned income errors in FFY 2006 accounted for 32 percent of agency-caused

error dollars

Outcome: Reduce the percentage of agency-caused error dollars

Monitoring/Feedback: All Corrective Actions will be monitored and evaluated regularly

#	Corrective Action	Measurement Strategy	Lead	Status	Status
			Responsibility	Update	
E-1	Clarify policy manual sections related to estimating earned income	 Pertinent sections identified Target date for revisions established Manual changes implemented 	Policy & Program Development	Oct 07	Input received from field staff and manual revisions are underway. Manual change planned for 12/07.
E-2	Establish a statewide macro for income documentation on the CANO	 Development of statewide macro assigned Macro pilot conducted Statewide implementation complete 	Field Services	Oct 07	WR 5032 submitted 4/99 to be listed as a priority at IT prioritization meeting. RM's to get feedback to Field Services by 9/15 on WR enhancements/changes. Will continue to use current CANO format requirements. Macro development depends on priority of WR 5032.
E-3	Clarify CASS screen	 Define what the screen does Use EIS procedure with a broadcast to share the information with all staff 	SYSOPS	Oct 07	Draft CASS procedures provided to CAFÉ on 9/6/07 Awaiting feedback from RM's on how to present the info to staff
E-4	Ensure increased use of the CASS screen as a comparison before authorizing benefits	 Identify strategies for evaluating prevalence of CASS screen usage Decreased errors at data entry / missing reported information 	Central, Coastal, Northern & Southeast Regional Mgrs	Oct 07	Training will be needed when procedures are ready.

Problem: Earned income errors in FFY 2006 accounted for 32 percent of agency-caused

error dollars

Outcome: Reduce the percentage of agency-caused error dollars

Monitoring/Feedback: All Corrective Actions will be monitored and evaluated regularly

#	Corrective Action	Measurement Strategy	Lead Responsibility	Status Update	Status
E-5	Profile high risk income/high allotment cases	 High risk target cases profiled for each region Number of target case-types for review established by office Number of target cases reviewed 	Program Integrity & Analysis	Nov 07	Wage & salary errors down to 32% in 2006, so far 16% in 2007. PIA will continue to provide quarterly reports to help managers figure out what cases are high risk. Managers will provide feedback on needs or changes. Target numbers not yet addressed. ¹
E-6	Provide refresher training in estimating earned income for seasoned caseworkers	Training plan developedNumber of caseworkers attending refresher training	Staff Development & Training	Oct 07	Chief of Field Services and SD&T will meet about refresher training and provide status update at 10/07 CAFÉ.
E-7	Increase interactive interviews (interviews with a supervisor present to provide constructive feedback to the caseworker) to ensure caseworker is asking follow-up questions.	 Regional goals for conducting interactive interviews identified Number of interactive reviews monitored via the case review system 	Central, Coastal, Northern & Southeast Regional Mgrs	Nov 07	QA Program Officer sent an email to the Regional Managers 6/15 to get their summary of current practice. Responses will be provided to CAFÉ.

^{*}Shaded corrective actions address more than one problem identified in this plan.

9/18/07 CAFÉ Page 21 of 26

¹ Review of last 3 federal fiscal years of QC data and notes higher gross income appeared to equate to higher error rate. Higher benefit did not appear to have higher error rates. SERO - targets case reviews up front by worker - new workers and workers needing more guidance. CEN - targets cases with FS benefits between \$200-\$900 with income (either earned or unearned) – all transfers and as many maintenance cases as time allows. NRO – targets cases being transferred out and transaction log of benefits \$500 and over. COA – ?

Problem: More errors tend to occur at re-certification than at certification

Outcome: Improved accuracy of benefit issuance at re-certification

Monitoring/Feedback: All Corrective Actions will be monitored and evaluated regularly

#	Corrective Action	Measurement Strategy	Lead Responsibility	Status Update	Status
R-1	Develop standard requirements for interface checks and provide comprehensive interface training	 Interfaces and protocol for use evaluated Alerts generated by each interface evaluated Standard requirements for interface checks developed Training plan established Number of caseworkers trained 	TBD – multi- unit task	10/07	 Taken to the Coordination Team, then to the Management Team and now to COFS to identify lead responsibility/authority. QA worked on PowerPoint presentation for cancelled Learning Summits which will need updating before use. Regional Managers will meet with COFS and provide more input and guidance for the CAFÉ on what the issues are regarding the alerts and interfaces.
R-2	Standardize case review process statewide	 Standard requirements for case reviews developed - Training plan established Number of reviewers trained 	Field Services	10/07	 Case review guidelines have been developed by Field Services, however more work is needed to expand the rules for comments and to explore means of tracking trends on <\$26 errors without impacting performance evaluation process and to incorporate PERM. Plans are to post standards as a guide on the manuals area of the web. Managers will bring issue of needed case review tool modifications to Managers and IT Prioritization Meetings. Field Services will submit a case

Problem: More errors tend to occur at re-certification than at certification

Outcome: Improved accuracy of benefit issuance at re-certification

Monitoring/Feedback: All Corrective Actions will be monitored and evaluated regularly

#	Corrective Action	Measurement Strategy	Lead Responsibility	Status Update	Status
					review training plan to QA Program Officer for possible FS Reinvestment funding by 4/20/07.
R-3	Profile high risk cases at re-cert	 High risk target cases profiled for each region Number of target case-types for review established for each office Number of target cases reviewed 	Program Integrity & Analysis	Nov 07	 QA Research Analyst provided group with error elements and causes for past three fiscal years to help identify high risk cases. CAFE group provided suggestions for factors to research for May & November payment spikes (combo cases, tribal TANF, PFD, seasonal work, holiday application surge)
R-4	Address issues with the GEN 72 form - develop a new form or use the GEN 50 instead of the GEN 72	 Issues with GEN 72 identified Options and strategies to replace GEN 72 identified and evaluated 	Application Project Team	Mar 08	 Allow time to gather feedback on the new GEN 50B. What are the issues with GEN 72 besides multiple mailings?
R-5	Address GEN 72 multiple mailings issue	Feedback obtained on how multiple mailings cause errors	Field Services	Nov 07	 How do MMs cause errors? The MM issue will be incorporated in the notice project. Field Services is lead on that project. WR # 5473 will be addressed as part of notice project.
see E-3	Clarify CASS screen	 Define what the screen does Use broadcast and/or other means of sharing the information with all staff 	SYSOPS		See E-3

Problem: More errors tend to occur at re-certification than at certification

Outcome: Improved accuracy of benefit issuance at re-certification

Monitoring/Feedback: All Corrective Actions will be monitored and evaluated regularly

#	Corrective Action	Measurement Strategy	Lead Responsibility	Status Update	Status
see E-4	Ensure increased use of the CASS screen as a comparison before authorizing benefits	 Identify strategies for evaluating prevalence of CASS screen usage Decreased errors at data entry / missing reported information 	Central, Coastal, Northern & Southeast Regional Mgrs		See E-4
see E-7	Increase interactive interviews (interviews with a supervisor present to provide constructive feedback to the caseworker) to ensure caseworker is asking follow-up questions.	 Regional goals for conducting interactive interviews identified Number of interactive reviews monitored via the case review system 	Central, Coastal, Northern & Southeast Regional Mgrs		See E-7
R-6	Implement intranet web site to share best practices	Explore feasibility and outline tasks necessary to establish and maintain the web site	Operations Support & QA	Nov 07	QA will work with Operations Support to draft a process similar to that used by Nevada and will provide an update at the Aug CAFÉ.
R-7	Regularly review performance measures with staff / promote and recognize quality work	 Successful strategies identified and shared with all offices On-going monitoring demonstrates staff familiarity with performance measures and recognition for quality work 	Central, Coastal, Northern & Southeast Regional Mgrs	Oct 07	Regional Managers emailed QA Program Officer a description of their successful strategies for compilation. The information will be shared at the Aug CAFÉ.

9/18/07 CAFÉ Page 24 of 26

Problem: In most fiscal years there appears to be a fall payment error rate spike.

Outcome: Research and evaluate the apparent fall payment error rate spike in order to develop appropriate corrective

action

Monitoring/Feedback: All Corrective Actions will be monitored and evaluated regularly

#	Corrective Action	Measurement Strategy	Lead Responsibility	Status Update	Status
S-1	Analyze QA case errors as well as payment errors to get a better understanding of the problem	 Case errors graphed by occurrence for a 3 year period Case errors sorted and grouped by cause 	Program Integrity & Analysis	Nov 07	 Graph provided QA Research Analyst provided group with error elements and causes by quarter for past three fiscal years in sortable lists PIA will provide an analysis of the 13 fall season "policy incorrectly applied" errors
S-2	Incorporate ability to track the date the error action/inaction occurred in the case review tool	 Occurrence request incorporated in system screen enhancements priority list Analysis on implementing this change completed Occurrence date incorporated in system 	Field Services	9/07	Programmers are lined up and a meeting will be set to start working on case review tool updates. Field Services will provide an update including the request to add the error occurrence date.
S-3	Capture all errors, including those under \$26, in the case review tool	Reduced number of cases in case review tool listed as "no error" with an accompanying error reason and factor	Central, Coastal, Northern & Southeast Regional Mgrs	9/07	This item is also tied to the case review tool. Regional Managers will meet with the COFS and will provide an update on exploring a means of tracking trends on <\$26 errors without impacting performance evaluation process.
see R-2	Standardize case review process statewide	 Standard requirements for case reviews developed Training plan established Number of reviewers trained 	Field Services	10/07	See R-2
