Supplemental Nutrition Assistance Program (SNAP) Agreement to Purchase and Prepare Separately

Please read carefully

You told us during your interview that you, and members of your household, do not purchase your food and prepare your meals with other people with whom you live.

To qualify as a separate household for SNAP (formerly known as Food Stamps) purposes, you and your household must agree to the following:

- I/We pay for our groceries separately from the other people living in the home.
- I/We cook and prepare food separately from the other people living in the home.
- I/We may shop together with the other people living in the home; however, we always purchase our food separately. I/We never purchase our food together and then split the grocery bill.
- I/We may eat together with the other people living in the home; however, we always cook and prepare our food separately. I/We understand that SNAP benefits are intended to purchase food for those included in the SNAP case.

If you qualify as a separate SNAP household, please sign and have all other adult members living in the home sign below.

We certify that our households purchase our food and prepare our meals separately from the other people in the home.
